A Pioneering & Innovative University

Active Learning

MUST professors apply active learning strategies within a blended learning model relying on a rich library of resources both physically and online to prepare students for engaging classroom sessions.

Service Learning

Every MUST program also integrates community service projects serving to reinforce essential values of social and environmental responsibility as well as knowledge and skills acquired in the classroom.

Changemaker Training

Every MUST program integrates a changemaker training curriculum focusing on developing a leadership mindset.

Global Education

All MUST programs offer ample opportunities for international education and research through our large network of partner institutions.

MUST University is accredited by the Ministry of Higher Education & Scientific Research according to authorization No 04–2022.

MUST
UNIVERSITY

MUST University is a trailblazing institution nestled in the vibrant Lac 3 offering programs in software engineering, Data science, AI, and cybersecurity. Academic programs blend academic rigor with real-world experience and are enriched by formal leadership training as well as breadth electives in humanities and social sciences.

MUST adopts innovative teaching methods such as blended, active, and service learning and works to integrate its students in the global knowledge economy through its worldwide network of founders and adjunct faculty.
